Portfolio: https://puerinchristian.github.io/MyPortfolio/

OBJECTIVE

Dedicated 4th-year BSIT student seeking an internship to apply my skills in software development and system administration. Eager to learn from professionals and contribute to real technology projects while growing technically and professionally.

EDUCATION

Bachelor of Science in Information Technology (in progress)
Cebu Eastern College (CEC), Cebu City, Philippines | Expected graduation: S.Y. 2026–2027

Senior High School, General Academic Strand (GAS)
Mabini Integrated School (MIS), Cebu City, Philippines | Graduated S.Y. 2022–2023

SKILLS

Working Knowledge: C, C++, Java, HTML, CSS, JavaScript, GIT, GitHub

Familiar With: Python, Django, OpenCV, Windows Server, Active Directory Domain Services (AD DS), Domain Name System (DNS), networking, system administration

Soft Skills: Leadership, Teamwork, Problem-solving

PROJECTS AND EXPERIENCE

ClassGuard: Capstone Project | 2026–2027
Django, Python, OpenCV

- Built a Django web app that detects physical aggression (e.g., slapping, punching) from camera feeds, with incident logging, an alert workflow and anonymous reporting.
- Added a legal-guidance module seeded with Philippine laws (RA 11313 Safe Spaces Act, RA 10173 Data Privacy Act).
- Developed live detection with on-screen boxes that turn from green to red when a flagged event is detected.
- Resolved library compatibility issues (Python 3.12 vs 3.14, OpenCV changes). Approved by the capstone panel.

TaskFlow: Task Management System | 2025–2026
Team Project, Lead Developer | Django, Python, SQLite, HTML, CSS

- Led a team in building a task management web app with user signup and login, per-user categories, and a dashboard with stats, donut and bar charts.
- Built task features including subtasks, due dates and reminders, repeating tasks, starred priorities, search, filters, and notes and attachments.
- Used Django models, views and forms with a SQLite database and HTML templates.
- Proposed the project idea to the team and led its development as lead developer.

Windows Server AD DS & DNS Setup | 2025–2026
System Administration (SAM) Final Project | Windows Server, Active Directory, DNS

- Installed and configured the Active Directory Domain Services (AD DS) and Domain Name System (DNS) Server roles on Windows Server, and promoted the server to a domain controller in a new forest.
- Set up the server's static IP address and hostname, and created a reverse lookup zone with a PTR record in DNS.
- Verified the deployment with dcdiag and nslookup tests.
